PROJECTS

SuitApp

A full-stack social media app devoted to uniting the cultural world of cosplay and costume fashion.
- As UI/UX Lead, I was the primary designer and features manager
- Praised as one of the best overall and fully-formed apps created by our class after we demo-ed to the other Pursuit cohorts and faculty
- Asked to re-demo SuitApp once we learn and subsequently implement full user authentication

holDing

A full-stack social media network app that empowered users to create and thrive in their own micro networks.
- As Tech Lead, I was the primary coder, program architect, and version control manager
- Ultimately managed over 50 non-master branches and 150k lines of code
- Completed a widely-lauded minimal viable product in a week's time
- Honorably selected as the lone group to demo our app in front of a visiting group of Pursuit's funders

HangXx

A fully-fledged purely-Javascript command line interface hangman game to be played in Node.js runtime.
- Wrote over 1,000 lines of organized code in just over a week
- Actuated an interactive and responsive visual and audible play environment
- Proud to detail HangXx as my first major solo project at Pursuit
