PROJECTS

Endeavor

A volunteer management web app developed to drive an organization's engagement with its industry volunteer community

- Thoroughly-designed Endeavor for four user groups: admins, volunteers, teachers, students
- Championed an organized, D.R.Y. components-based React frontend, leveraging SCSS/CSS
- Constructed a robust REST API to manage data using Node.js, Express.js, and PostgreSQL
- Implemented user authentication with Passport.js, Bcrypt, and local-strategy session headers
- Integrated ChartJS & SendGrid API for visualization UX and productivity functionality
- Styled a media-responsive UI using Bootstrap 4 breakpoints and BEM methodology

Greenlist — *Hackathon Winner*

A registry & forum web app connecting eco-conscious fashion designers with makers & suppliers of sustainable textiles, secondly enabling a powerful material reclaim network

- Won "MOST IMPACTFUL APP Award" at Pursuit's Uber-sponsored 6.2 Hackathon
- As Tech Lead, I established consistent Git workflow as well as troubleshot the majority of Git problems, including merge conflicts and commit issues

Bingebook

A full-stack binge-facilitating social media app where users can discuss, list, recommend, and critique shows, series, and films

- Architected streamlined integration with the OMDb API maintaining one source of truth using unique ids pulled from their database to manage local server data synchronously
- Programmed several multiple-step processes between the React frontend, Express server, PSQL database, and external OMDb API with organized control and data flow in mind

SuitApp

A full-stack social networking app dedicated to uniting the cultural world of cosplay and costume fashion by giving personas, events, and happenings a standardized platform

- Successfully incorporated prototyped visual concepts into an engaging and memorable user interface using React, Figma, Colormind, and Adobe Creative Suite
- Utilized scenario mapping and user testing to methodically improve SuitApp's UX

Open Source Contributions: J.P. Morgan, ConsenSys, Pursuit

PROFESSIONAL DEVELOPMENT

Pursuit, Long Island City, NY — *Full-Stack Web Development Fellowship*
JUNE 2019 - PRESENT

A Google-sponsored coding fellowship with a 9% acceptance rate from 1500+ applicants annually, beginning with a 12-month intensive instructional core. Successful fellows master technical and professional skills and have been hired at leading companies including Capital One, Pinterest, J.P. Morgan, and Spotify.

OTHER EXPERIENCE

Joseph Chen Studio, New York, NY — *Lead (First) Assistant & Producer*
JUNE 2013 - PRESENT

- Heads full-scale high fashion & e-commerce photography productions as the essential deputy of the photographer
- Achieved more than 40 successful shoots, managing numerous large teams of unique personalities in high-stress, fast-paced settings with critical attention to detail
- Developed the team's optimized professional workflow based off of a divide-and-conquer methodology that has proven vital to the company's success

Joseph Pasaoa Photographer, New York — *Manager & Photographer* (*website*)
JAN 2008 - PRESENT

- Accomplishes high-standard commissions for photographic imagery, drawing from a creative toolbox of over 10 years of photographic study, experience in expression, motion, and style, along with an understanding of art history and photographic theory
- Produced an extensive portfolio of dozens of images nationally and globally published in publications including *Harper's Bazaar India* and *American Dancer Magazine*
