PROJECTS

Endeavor
A volunteer management web app developed to drive an organization's engagement with its industry volunteer community
- Championed Endeavor for four user groups: volunteers, managers, students, teachers
- Built an organized, DRY components-based React frontend, leveraging SCSS
- Compiled a robust REST API to handle data using Node.js, Express.js, and PostgreSQL
- Implemented user authentication through Passport.js, Bcrypt, and session cookies
- Integrated ChartJS & SendGrid API for visualization UX and productivity functionality
- Styled a media-responsive user interface using Bootstrap 4 breakpoints as basis

Greenlist — *Hackathon Winner*
A registry & forum web app connecting eco-conscious fashion designers with makers & suppliers of sustainable textiles, secondly enabling a powerful material reclaim network
- Won "MOST IMPACTFUL APP Award" at Pursuit's Uber-sponsored 6.2 Hackathon
- As Tech Lead, I established consistent Git workflow as well as troubleshot the majority of Git problems, including merge conflicts and commit issues

Bingebook
A full-stack binge-facilitating social media app where users can discuss, list, recommend, and critique shows, series, and films
- Architected integration with the OMDb API to keep one source of truth using their unique ids and data as the sole data source to pull from for the app's local database
- Programmed several multi-stage processes between the React frontend, Express server, PSQL database, and OMDb API with emphasis on optimal control flow

SuitApp
A full-stack social networking app dedicated to uniting the cultural world of cosplay and costume fashion by giving personas, events, and happenings a standardized platform
- Successfully incorporated visual concepts into an engaging and memorable user interface using React, Figma, Colormind, and Adobe Creative Suite
- Utilized scenario mapping to methodically improve SuitApp's user experience

PROFESSIONAL DEVELOPMENT

Pursuit, Long Island City, NY — *Full-Stack Web Development Fellowship*
JUNE 2019 - JUNE 2020

12-month intensive code fellowship with a 9% acceptance rate from 1500+ applicants annually. Successful fellows master technical and professional skills and have been hired at leading companies including Capital One, Pinterest, J.P. Morgan, and Spotify.

OTHER EXPERIENCE

Joseph Chen Studio, New York, NY — *First Assistant & Producer*
JUNE 2013 - PRESENT
- Supervises full-scale high fashion & e-commerce photography productions as the essential deputy of the photographer
- Achieved more than 40 successful shoots, managing countless teams of unique personalities in high-stress, fast-paced settings with critical attention to detail
- Developed the team's optimized professional workflow based off of divide-and-conquer that has proven vital to the company's success

Joseph Pasaoa Photographer, New York — *Manager & Photographer (website)*
JAN 2008 - PRESENT
- Fulfills high-standard commissions for photographic imagery, using a creative toolbox from 10+ years of photographic study, experience in expression, motion, and style, along with understanding of art history and photographic theory
- Produced an extensive portfolio that has been published nationally and globally
